

# ADVANCED COMPUTER APPLICATIONS

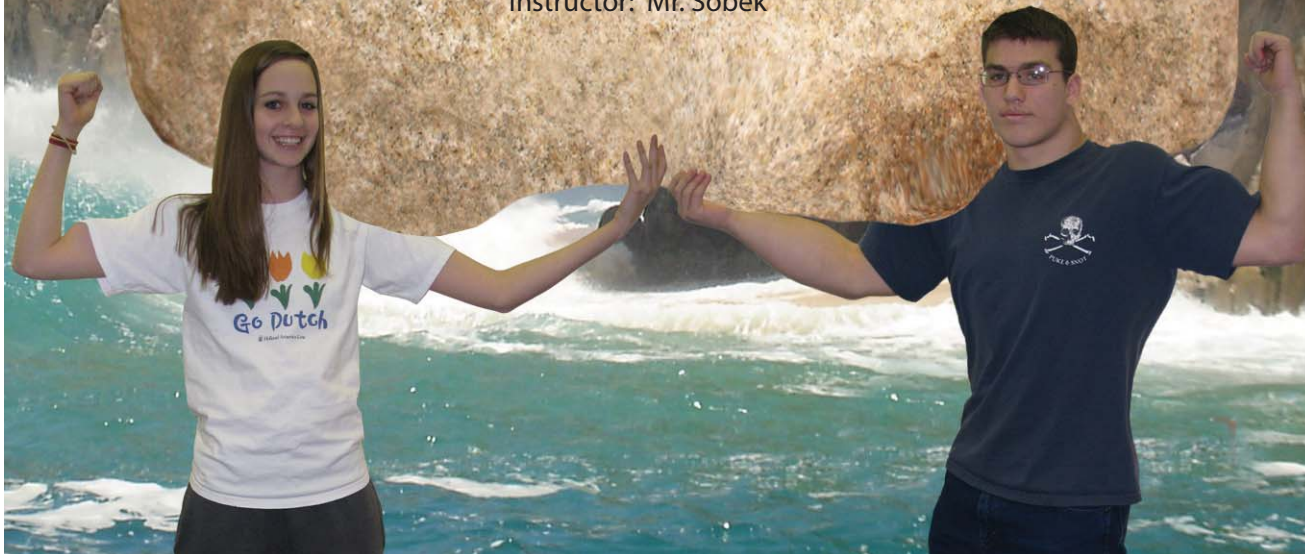

More advanced features of Photoshop will be used to edit photos and create animations that can be used on the web or in PowerPoint presentations. Both Photoshop and Dreamweaver will be used to create/modify web pages. MS Access is used for database management and MS Word will interface with the database. Access will also import data from an Excel spreadsheet. InDesign is used for desktop publishing, Illustrator for vector graphics, and Acrobat for PDF creation. We finish the year doing some audio and video editing.

The course is offered two ways:

1. Semester class that meets every day for half of the school year - 0291
2. Part time class that meets every other day for the entire school year - 0290

Students should expect to work hard every day to achieve success.

Instructor: Mr. Sobek

# BEGINNING AND ADVANCED COMPUTER APPLICATIONS

# BEGINNING COMPUTER APPLICATIONS

This class covers a wide variety of application programs. MS Word will be used to create and modify tables. Students will edit photos using Adobe Photoshop. Presentations are generated with PowerPoint. Various graphs are constructed with Excel. Adobe Dreamweaver will be used to build web sites. Adobe Illustrator is used for vector drawings. Forms, queries and reports are designed with MS Access Database. Adobe InDesign is used for desktop publishing. We finish the course doing video editing with Moviemaker.

The course is offered two ways:

1. Semester class that meets every day for half of the school year - # 0289
2. Part time class that meets every other day for the entire school year - # 0288

Students should expect to work hard every day to achieve success.

Instructor: Mr. Sobek
