REGISTRATION FORM LAST PAGE

The North Allegheny Summer Academy

Developed to provide youngsters in grades Kindergarten through Grade 5 a variety of academic and cultural experiences. The objective of the Academy is to provide the students with opportunities that will stimulate, enrich, and expand their interests and talents. The workshops will be directed and supervised by experienced educators of the North Allegheny School District and surrounding Districts. All workshops will be held at Peebles Elementary School.

This year North Allegheny Summer Academy will have an "Apps" theme. Many days will be filled with academic and cultural activities.

The following class listings are offered as our Appy specialties. Please review the outstanding classes taught by our Summer Academy instructors.

A Summer ARTventure!

Grades K-5

Come join us for an ARTventure when school lets out! This summer, we will be using a variety of materials to create nature-based artworks! We will use technology apps to document our creations such as stop-motion and time-lapse recordings. Students will be inspired by our environment to create unique works of art. We will be experimenting with sun printing, painting outdoors, papermaking, and clay dug from the McCandless area! Come make new friends from across the district as we experiment with new materials, and learn to creatively express ourselves! OH! and a FUN FACT, the last week of Summer Academy we will be making our own sidewalk chalk to use at home!

Ms. Emma Hughey

Super Scientists Lab

Grades K-2

A terrific scientific journey for students grades K-2! If you like experiments and fun, then the Super Scientists Lab is for you! Learn how to make slime, do tricks with magnets, and even make and eat your own home-made ice cream! Explore wonderful water, kitchen science, wacky weather, bubbles, and more. There's plenty of fun and learning in store for our curious little scientists!

Mrs. Jessica Magnone

Save the Seas Cooking Class

Grades K-5

Little hands can have a BIG impact! Join us as we cook, experiment, investigate, create, and travel to the sea! Become a culinary expert! This summer, join us as we come together to make delicious desserts, snacks, and recipes, all while learning about ways to help save the sea! Create an aquarium, sail boat, beach, sea creatures, and more with FOOD! Produce your own cooking show, explore the sea, and experience science in the kitchen! Don't miss out on the delicious fun this summer!

Ms. Lydia Sargent

Games Galore

Grades K-2

Board games, card games, and cooperative challenges, too; here's lots of fun and learning in store for you!

Board games are much more than what you do on a rainy day;

They teach strategy, critical thinking, and creativity as you play!

While each class will begin with a featured "game of the day," students will have the opportunity to self-select games as well. Self-selected games would allow for students to demonstrate their strengths and critical thinking skills. The games will also develop skills in vocabulary, reasoning, and many more all while collaborating with their friends! We're ready to laugh, roll, and spin our way to a great time. It will be a 'Kahoot'!

Ms. Jordan Bon and Ms. Andrea Gelman

My Dream Vacation is.....

Grades 1-5

Are you ready to plan your dream vacation then take your plan home to your parents and try to convince them why your idea should become reality. During this years' Summer Reading, the "Your Dream Vacation" workshop will include identifying the "perfect vacation location" through student description of The BEST vacation then having fun researching your dream destination. Finally we will prepare a written proposal to submit to our parents for their approval and HOPEFULLY, a DREAM TRIP come true.

Mrs. Amy Robertson

Super Scientist

Grades 2-5

Calling all super scientists who LOVE messy experiments and crazy crafts! Test out your estimation and problem solving skills as we explore Water Olympics concepts like surface tension. Discover the states of matter and make SLIME! Create miniature catapults and launch marshmallows into the atmosphere. Explode an Alka-Seltzer rocket or two while exploring all things physics and H₂O. Program a Blue-Bot or Sphero and create a maze for these friendly robots. Getting crafty, maybe color science and creativity is what makes you most 'appy. Join us as we dive into summer investigating all things STEAM!

Ms. Rachel Nard and Mrs. Julie Pistella

Superhero Inventors

Grades K-5

Did you know krypton is not just Superman and Supergirl's home planet? Can you move as fast as The Flash? Have you ever wanted to invent cool gadgets like Batman? If so, this is the class for you! We will spend these two weeks using our super brain powers to combine superheroes and science. We will learn and explore through experiments and inventions. Fellow students and families are welcome to join us for our Invention Showcase on the last day! Join us for a SUPER great time!

Mrs. Kristin Musher

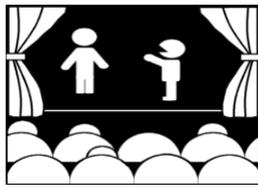

Game On!!

Grades 1-5

Do you love to play board games but sick of always playing the same old games? If you answered yes, then this is for you! At the beginning, you will have the opportunity to play many classic board games and problem solving games. We will look at standard board games, such as *Monopoly*, *Life*, and *Clue*. As well as various strategy-based games, such as *Chess*, *Checkers*, *Mastermind*, *Connect 4*, and more! As you play, you will compare the boards, pieces, problem solving aspects, and rules. Then, you'll be able to put your creativity to the test and create your very own game! Your idea will be brought to life and you will have the opportunity to have other people actually play your game! At the end, you'll have a new game to play with your family and friends!

Ms. Katelyn Vigna

Creative Theater

Grades 1-5

Theater is such an important part of life. Students need to be able to experience how to read expressively and enthusiastically. Creative dramatics are important to elementary students, and during the school year teachers find it difficult to find time for creative dramatics. During this camp children will learn how to read in a prosodic way. Given a script they will get a chance to go up on stage and act. They will also get some experience with improvisation. At the end of the Summer Academy they will get the experience to perform in a play.

Ms. Carly McDonald

Exciting Experiments

Grades 3-5

A terrific scientific journey for students grades 3-5! If you like experiments and fun, then the Exciting Experiments class is for you! Learn how to make slime, do tricks with magnets, and even make and eat your own home-made ice cream! Explore wonderful water, kitchen science, wacky weather, bubbles, and more. There's plenty of fun and learning in store for our curious scientists!

Mrs. Jill Cronin

Computer Coding Craze!!

Grades 3-5

Ever wanted to create and code your own computer game? Now is your chance! Students will participate in an innovative class where they will learn basic coding skills and programming, as well as use their logic and problem solving skills! Over the course of the two weeks they will design games, digital stories and animations. Students will also participate in "unplugged" activities that get them up and moving, as they learn the concepts and ideas behind coding. All ability levels are welcome, from the experienced to those who don't even know what coding is!

Ms. Megan Oberndorf

Music Makes me hAPPy

Grade Level 3-5

Music makes the world go round; come and explore all of those sounds. Clap your hands, stomp your feet, play the drums and the uke...it's SWEET! We'll sing a little and play a lot, if music makes you hAPPY, we'll save you a spot. African Drumming, Ukuleles, Singing, Orff Instruments-Beginners are welcome! No experience necessary!!!!

Mrs. Anne Funk & Mrs. Margie Craska

Strum and Sing (ONE WEEK ONLY - June 24-28)

Grades 3-5

Strum and sing this year at Summer Academy with Mrs. Monahan! Any students in grades 3-5 are welcome to join in the fun. Students will learn basic ukulele chords and strumming patterns to accompany singing. We will play a wide variety of music from tradition folk tunes to current pop songs. Students are invited to bring their own ukulele, but they may also borrow a school uke for the week! No prior ukulele experience is necessary ☺

Mrs. Madeline Monahan

Grades K-5 Students with IEPs ONLY
The following class is offered during
Session I and/or Session II
Session I - June 17th to June 28th
Session II - July 1st to July 12th (NO Class July 4th)
Students must have a North Allegheny IEP to attend the following
class

The App Zone

Grades K-5

Join us for an Appy Summer Academy 2019! Together we will enhance our summer learning through creative activities while practicing reading vocabulary, comprehension, interactive communication, and math problem solving skills. This class is designed for students currently in grades K-5 with an existing IEP for academics and/or speech and language, focusing on improving social, reading, writing, and math skills! Let's have an Appy Summer!!
