

# Summer Program 2023

June 26–August 3 | Monday–Thursday | 9:00 a.m.–3:30 p.m.

**High school juniors invited to apply** (Application deadline: Friday, March 31)

Over the course of this six-week paid summer experience, you will work independently, on group projects, and with mentors to gain an improved sense of self and be better able to answer the following questions:

- ▶ Who am I?
- ▶ Who do I want to become?
- ▶ How do I get there?
- ▶ How will I continue to learn?
- ▶ How will I give back to my community?

**You will receive a stipend of up to \$2,000 and a laptop for use during the program.**

You'll establish relationships and rituals, participate in essential skill workshops, complete projects that address real-world problems, and create a personalized road map for your future success.

On-site programming will take place at the Readiness Institute, located at the Energy Innovation Center in Pittsburgh, PA. Additionally, there will be off-site programming at a variety of education, community, and industry institutions as well as virtual programming presented over Zoom.

You can learn more about the program and submit your application at
