## AP Pre-calculus

## Summer Tune-up Directions

To prepare for AP Pre-calculus, it's crucial to engage with the Algebra II review content provided by the College Board. Here's a step-by-step guide to ensure thorough preparation:

1. **Watch the Videos:** Begin by scanning the QR code provided accessing the series of thirteen videos created by the College Board for Algebra II review. Each video is designed to cover specific content relevant to the AP Pre-calculus curriculum. Take notes as needed to reinforce key concepts.
2. **Complete the Skills Worksheets:** After watching each video, proceed to complete the skills worksheet associated with the video's content. (You will find the worksheet located in the expanded video description below the video title.) These worksheets are designed to help reinforce your understanding of the material covered in the videos. Refer back to the video and your notes as necessary to assist you in completing the worksheet accurately.
3. **Check Your Solutions:** Once you've completed each worksheet, carefully review your solutions. Check them against the provided answer key or solution guide, also located in the expanded description box under the video title. Take note of any problems that you may have missed or answered incorrectly.
4. **Redo Problems for Mastery:** For any problems that were answered incorrectly, take the time to redo them until mastery has been achieved. Refer back to the video and relevant sections of your notes to identify and address any areas of confusion or misunderstanding.

By following these steps and actively engaging with the video content and accompanying worksheets, you'll be better prepared to excel in AP Pre-calculus.

Consistent practice and review are key to building a strong foundation in Algebra II and succeeding in more advanced math courses.
